

ENGLISH TRAVEL

The day in London !

Our favorite part about the travel was the day in London. Firstly, we would like to describe this day (what we did) and secondly, explain and comment why we liked it.

First of all, we were into the bus at 8:00. All the travel, we played a card game so funny that we didn't see the time passed ! At 11:00, we arrived in London, where we were placed beware of the Natural History Museum.

We've decided to go to Harrods, the most famous market of London! At the moment we set feet, we were strangely impressionned by the incredible atmosphere. It's very complicated to explain, but we felt a sort of peace because we saw everyone running, like us. We wanted to see a golden baby-foot, so we went into all of the levels in the search of it. Unfortunately, we didn't found it, but we past a very good afternoon! This market was very huge, so we talked to about ten police men, because we were lost in this big maze-tower... All of our friends were attracted by the

new technologies like laptops, phones, television our headphones...

We exit it with stars in the eyes! In the second time, we went into the Natural History Museum.

It was so big that we couldn't see everything... We had to choose the highlights of this place, in order to see the best things possible. At the first time, we went into the prehistoric's animals gallery, where we saw some giants bones of antics fishes or T-Rex! Next we saw dead birds and a rarely Dodo, the unfounded type of birds! After that we went into the pacific room, where it had a lot of shells and aquatics animals, like a very big fish or a giant whale ! Finally, our museum's tour finished by a see into the emeralds and precious rocks room. They were

all of the rocks possibles! We saw a meteoric iron, an Amethyst, and finally the beautiful *Ostro Stone*! Like Harrods, we exit this place with stars in the eyes, because it was a very impressing and beautiful museum! We slept a lot in the bus, thank to this very rough day!

THE END!
