

« THE WORLD OF BANKSY » REPORT

Émeline Grandin, June 7th, 2023

« The World of Banksy » is an exhibition that showcases the artwork of the anonymous British street artist known as *Banksy*.

The exhibition aims to bring together a collection of Banksy's works, including original paintings, prints, sculptures, and installations.

The exhibition typically features a wide range of Banksy's most iconic pieces, such as "Girl with a Balloon," "Rage, Flower Thrower," "Love is in the Air," and many others.

« Girl with a Balloon »

I found this exhibition very interesting with a lot of very different works which can be interpreted in different ways.

The intimate spaces, subdued lighting, minimal text, video clips and soundtrack combined to offer a truly immersive experience.

We could imagine that we were in a kind of sewer in the company of all the rats on the walls.

I found that some works were very powerful and some could make us think about the meaning and the message that Banksy wanted to convey to us. A lot of tragic events are depicted with tender sadness.

I found some of the phrases used as graffiti very powerful.

In addition, the brief explanations next to each work are a real advantage to understand the message conveyed by the work.

On the whole, the exhibition was well done with a good overview of the art of Banksy, the setting creates a street art experience.
