

## **Rye**

Rye is a small ancient town on the south coast of England, its economy mainly depends on tourism. There are numbers of old buildings, including a small chapel, abandoned tower and more. We visited it during one of our free-time so we were able to discover it at our own pace, which was a lot of fun.

We saw the chapel, the castle and some of us went to a square nearby while the other wanted to see the shops to buy some souvenirs.

This is one of the place we liked the most because we had plenty of time to enjoy it before the bus came to pick us up, this was really cool because we were more than often in hurry in order to do all the activities planned. So this change of pace was more than welcome in our opinion
